Our Story

Inkwell Design OÜ is a professional illuminated sign solution provider founded in 2014. Over the years, we have established ourselves as a reliable and experienced company that offers top-notch services in Estonia and abroad. We deliver and install also in Sweden.

We offer a comprehensive solution to help you turn your advertising concept into a profitable lit sign. Our full services fit your unique demands, from creating the logo to installing the finalized sign. We operate from business plant with an area of over 1000 m², and the technology we have is the latest generation and as such meets all the requirements of today's market.

Enviromental protection

We pay attention to keeping down the environmental impact during the production process. It applies to our signages, as well. They are optimized for the lowest energy consumption. We constantly strive to integrate the latest technical developments to produce

environmentally friendly products in the future. All accumulating waste materials are professionally disposed of and routed into the recycling system. From the point of view of energy technology, advertising systems are almost exclusively equipped with LED lighting.

VISION & MISSION

MISSION

At Inkwell Design OÜ, our mission is to provide high-quality illuminated sign solutions to our clients in Estonia and internationally.

We are committed to delivering top-notch services that meet the unique needs of our clients.

VISION

We aim to expand our business by building solid client relationships and improving production processes.

We strive to be at the forefront of technological advancements in the industry and deliver innovative solutions that exceed our client's expectations.

Our Products

We provide the entire range of SIGNS: illuminated or without illumination, from the smallest letter through to a large-scale installation, from individual production to completed series with many items. We treat each project and brand like it is our own.

Letters

Letter signs are individual letters/shapes made of metal, plastic, or acrylic, illuminated by LED lighting or without. Customizable to match branding and specifications. Ideal for businesses of all types and sizes.

Profile 00

Not illuminated

Description

Profile 00 is an unlit flat letter made of various thicknesses and from multiple materials. It is usually made of aluminum sheet that is powder coated or stainless steel, acrylic, etc.

Material

Aluminum, composite (ACM/ACP), acrylic, and also stainless steel.

Size: 50–2000 mm

Depth: 2–30 mm

Stroke: min 8 mm

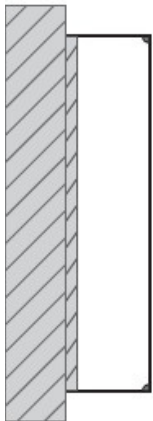

Profile 01

Not illuminated

Description

Profile 01 is simplest type of letter, without illumination and used as a elegant advertising element. Usually made from aluminium but other materials can used also (stainless steel, etc.)

Material

Front and sides: aluminum
Back: PVC (uncoated), aluminum, or none (depending on size and mounting location).

Size: 300–2000 mm
Depth: 20–120 mm
Stroke: min 30 mm

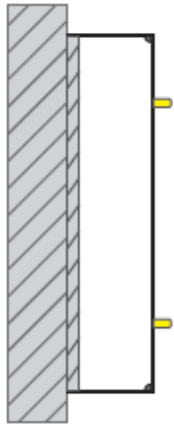

Profile 1

"LED neon" - illuminated to the front

Description

Profile 1 letter with LED neon line/contour gives your company a retro neon look using modern LED technology.

Material

Front: Aluminium and LED neon
Back: PVC (uncoated), aluminum, or none (depending on size and mounting location)

Size: 300-1800 mm
Depth: 30-100 mm
Stroke: 20 mm

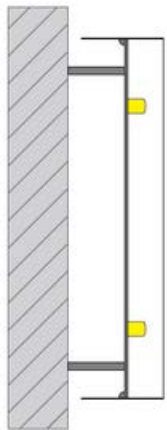

Profile 2

LED Neon - *illuminated to the front*

Description

Profile 2 is with neon-like LED and with a shielding edge that concentrates the light. LED Neon line/contour give your company a retro neon look using LED technology. This profile is suitable for large viewing distances.

Material

Front: 2 mm aluminium and 10-15 mm acrylic
Back: PVC (uncoated), aluminum, or none (depending on size and mounting location)

Size: 800 – 2500 mm
Depth: 70-120 mm
Stroke: 12 mm

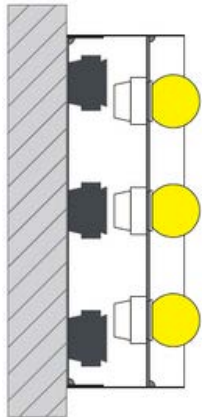

Profile 2

Retro - illuminated to the front

Description

Profile 2 "Retro" uses light bulbs with a shielding edge that concentrates the light. Usually, LED light bulbs are used, and different shapes and sizes are available.

Material

Front: 2 mm aluminum and LED light bulbs
Back: aluminum, PVC (uncoated), or none (depending on size and mounting location).

Size: 300-1800 mm
Depth: 50-120 mm
Stroke: min 70 mm

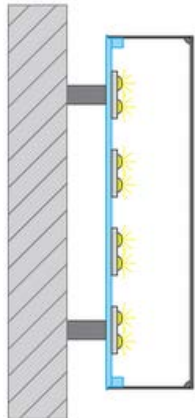

Profile 3

Illuminated to the back

Description

Profile 3 letters are where the lighting is directed towards the facade or a rear panel. Usually the letters are mounted separately on spacer bolts directly on the wall. If the facade is dark then reflector behind the sign is recommended.

Material

Front: 2-3 mm aluminum
Back: 5 mm white acrylic

Size: 300-1500 mm
Depth: 50-120 mm
Stroke: min 35 mm

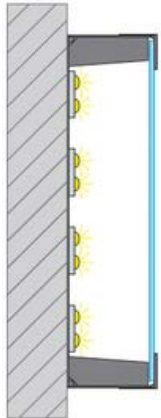

Profile 4

Illuminated to the front

Description

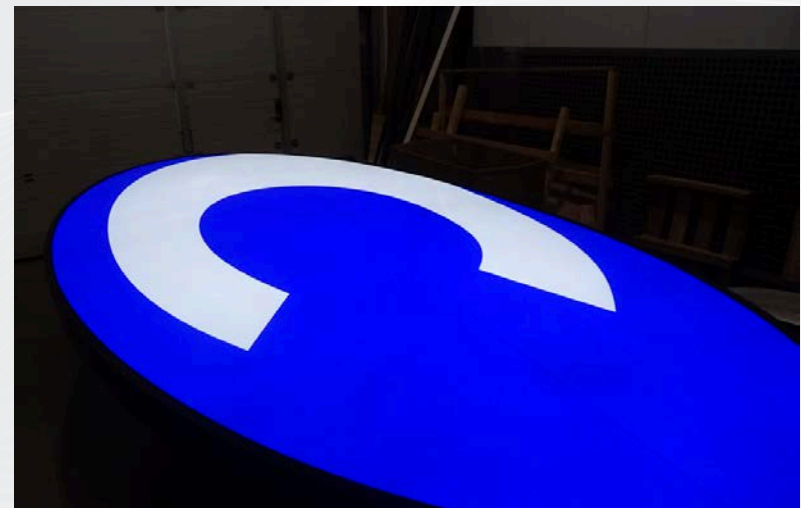

Profile 4 front is made of acrylic and is fixed with a sheet metal strip. This profile is usually suitable for large letters – higher than 1600 mm, but it is also possible to produce small letters with smaller metal strip.

Material

Front: 3-5 mm acrylic
Back: aluminum

Size: 400-3000 mm
Depth: 80-120 mm
Stroke: min 100 mm

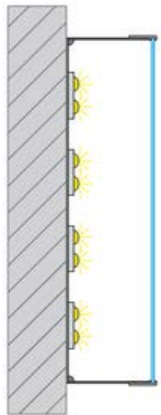

Profile 5

Illuminated to the front

Description

Profile 5 letter is where the back and side are made of aluminum which is powder coated. The front is made of acrylic plastic that is attached to the letter with a F-trim. This profile is very suitable for letters higher than 800 mm, but also available for smaller sizes.

Material

Front: 3 mm acrylic
Back: aluminum

Size: 300 – 2000 mm
Depth: 70-120 mm
Stroke: min 60 mm

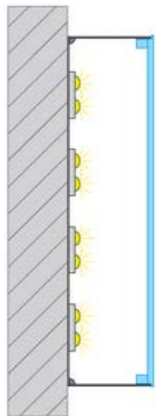

Profile 6

Illuminated to the front

Description

Profile 6 letter design looks cleaner and enables the front surface to be illuminated up to the edges. The front is made of acrylic which is illuminated from behind.

Material

Front: 5 mm acrylic
Back: aluminum

Size: 200 – 1600 mm
Depth: 50-120 mm
Stroke: min 30 mm

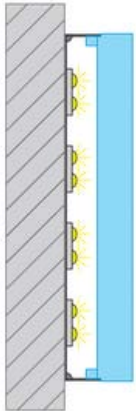

Profile 6-30

Illuminated to the front and sides

Description

Profile 6-30 letter design looks cleaner and enables the front surface and also sides to be illuminated. The front is made of acrylic which is illuminated from behind.

Material

Front: 30 mm acrylic
Back: aluminum

Size: 200 – 1600 mm
Depth: 50-120 mm
Stroke: min 30 mm

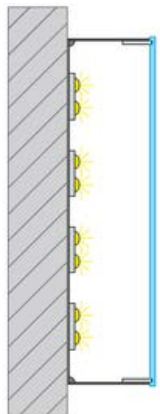

Profile 6S

Illuminated to the front

Description

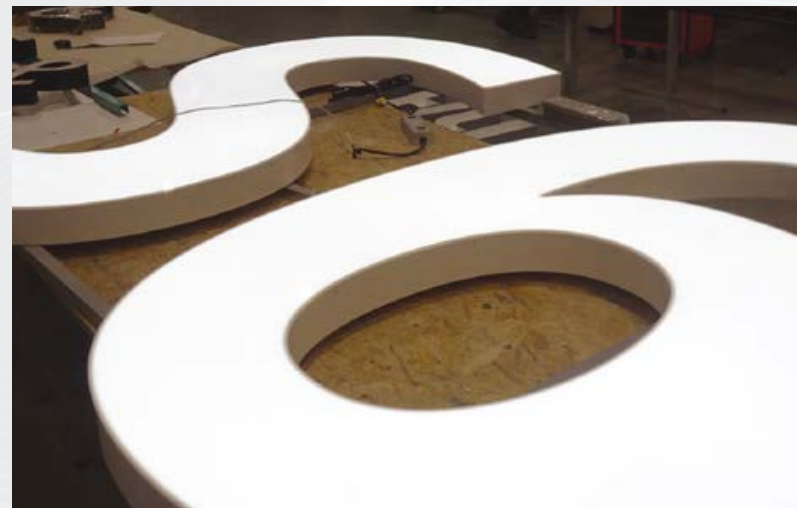

Profile 6S is made of welded aluminum letter body, and the front is 3-5 mm acrylic and is mounted with glued PVC attachment strip and screws. This product is suitable for more giant letters.

Material

Front: 3-5 mm acrylic
Back: aluminum

Size: 400-2500 mm
Depth: 50-120 mm
Stroke: min 35 mm

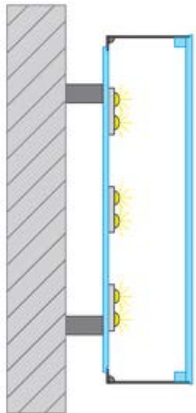

Profile 6+3

Illuminated to the front and back

Description

Profile 6+3 is a letter type that enables the front surface and also backside to be illuminated.

Material

Front: 5 mm acrylic
Back: 2 mm aluminum and
5 mm acrylic

Size: 400 – 2500 mm
Depth: 60-100 mm
Stroke: min 40 mm

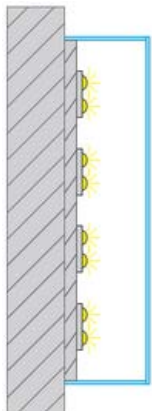

Profile 8

Illuminated to the front and sides

Description

Profile 8 is a letter type where the body of the letters are made of glued plexiglass. Plexiglas of different colors can be combined, so interesting color effects can be achieved.

Material

Front and sides: 3-5 mm acrylic
Back: PVC (uncoated) or aluminum
(depending on size and mounting location)

Size: 400-2500 mm
Depth: 60-100 mm
Stroke: min 40 mm

Lightboxes

Lightboxes are versatile, customizable signs suitable for various businesses, such as retail stores, restaurants, movie theaters, and healthcare facilities. They can be used to display promotional messages and create a welcoming atmosphere, and are available in both indoor and outdoor versions.

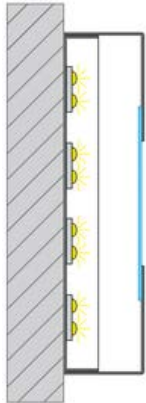

Lightbox L1

Illuminated to the front

Description

Lightbox L1 is very simple, where front aluminium surface is with cutout and illuminated from back.

Material

Front: 2 mm aluminium and 3 mm acrylic
Back: 2 mm aluminium

Size: 500x200 mm to
3000x1800 mm
Depth: 60-100 mm
Stroke: min 6 mm

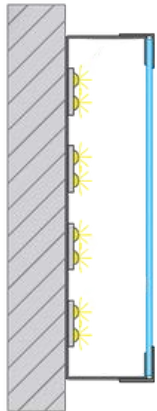

Lightbox L4

Illuminated to the front

Description

Lightbox L4 is with full illuminated front and can be covered graphic design.

Material

Front: 2 mm aluminium and 3 mm acrylic
Back: 2 mm aluminium

Size: 500x200 mm to 3000x1800 mm
Depth: 60-100 mm

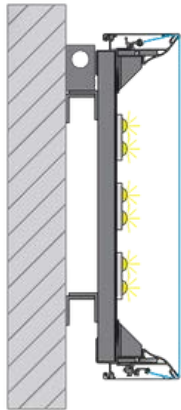

Lightbox L4 "Flex-Face"

Illuminated to the front

Description

Lightbox L4 "Flex-Face" is made of specially extruded aluminum profiles. The front is flexible and soft PVC fabric. This lightbox version is suitable only for extra-large sizes.

Material

Front: flexible PVC fabric
Back: aluminium construction and 2 mm aluminium composite

Size: 3000x600 mm to 8000x3000 mm
Depth: 140 mm

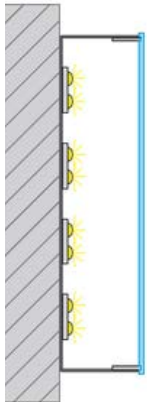

Lightbox L6S

Illuminated to the front

Description

Lightbox L6S is made of bent aluminum sheet and acrylic front. The front is mounted with glued PVC attachment strips and screws. This product is suitable for more giant lightboxes.

Material

Front: 5 mm acrylic
Back: 2 mm aluminum

Size: 500x200 mm to 3000x1800 mm
Depth: 60-100 mm

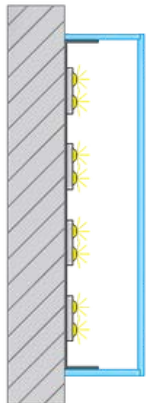

Lightbox L8

Illuminated to the front and sides

Description

Lightbox L8 front is made of glued acrylic where light is directed to front and sides. And vinyl graphic or letters are mounted on the front. The sign is illuminated inside and the lightbox sides gets a brilliant halo effect.

Material

Front: 3-5 mm acrylic
Back: 2 mm aluminium

Size: 500x200 mm to 3000x2000 mm
Depth: 60-100 mm

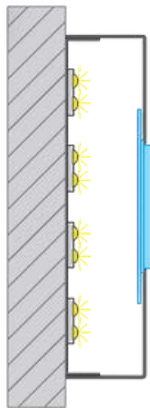

Lightbox L10

Illuminated to the front

Description

Lightbox L10 is made of aluminum (or aluminum composite panel), where the text is milled out and 10-15 mm thick acrylic letter is mounted in the milled on the text. To vary the colors of the letters, you can foil the characters in different colors. The sign is illuminated inside.

Material

Front: 2 mm aluminium, 3-15 mm acrylic
Back: 2 mm aluminium

Size: 500x200 mm to 3000x1800 mm
Depth: 50-100 mm
Stroke: min 6 mm

Flagsigns

Illuminated flagsigns are double-sided signs lit from within, ideal for indoor and outdoor advertising, often found in city centers, shopping districts, and highways.

Flagsign FS1

Illuminated to the front

Description

Flagsign FS1 front is made of aluminum (or aluminum composite panel), and the text is milled out.

It is similar to Lightbox L1; the only difference is that flagsign is usually double-sided and mounted to the wall or ceiling.

Material

Body: 2 mm aluminium and 3 mm acrylic
Frame: aluminium profile

Size: 400x200 mm to 1200x2800 mm
Depth: 80-200 mm
Stroke: min 6 mm

Flagsign FS4

Illuminated to the front and/or

Description

This flagsign has a fully illuminated front and can be covered in graphic design. A 20-30 mm aluminum profile is used as edge trim. Suitable for bigger flagsigns.

Material

Body: 3-5 mm acrylic and metal edge trim

Frame: bended aluminium or aluminium profile

Size: 400x200 mm to 1200x2800 mm

Depth: 80-200 mm

Stroke: min 6 mm

Flagsign FS6

Illuminated to the front

Description

Flagsign FS6 is the most used version of flagsign because of its simplicity and beauty. The front is made of opaque acrylic and is usually covered with foil in different colors. The sign is illuminated inside, and the front edges are illuminated a little bit.

Material

Body: 5 mm acrylic
Frame: aluminium profile

Size: 400x200 mm to 1200x2800 mm
Depth: 80-200 mm

Flagsign FS8

Illuminated to the front and sides

Description

Lightbox L8 front is made of glued acrylic where light is directed to front and sides. And vinyl graphic or letters are mounted on the front. The sign is illuminated inside and the lightbox sides gets a brilliant halo effect.

Material

Body: 2 mm aluminum, 3-10 mm acrylic
Frame: aluminium profile

Size: 400x200 mm to 1200x2800 mm
Depth: 80-200 mm
Stroke: min 6 mm
